RF Passive Splitters

The 7702 series RF passive splitters provide distribution of RF signals in a 1x2 or 1x4 configuration (designated by SP2 or SP4 in the part number). The operating frequency range is 40MHz to 2200MHz allowing both 70/140MHz IF and L-band signal distribution. When equipped with the "-LNB" option, DC power can be passed through any of the outputs to the input for LNB power (input frequency range limited to 400MHz-2200MHz). Diode protection ensures that no conflicts arise in the event that multiple connections provide DC power.

The 7702SP2 and 7702SP4 occupy one card slot and can be housed in a 1RU frame which will hold up to three modules, a 3RU frame which will hold up to 15 modules, a 350FR portable frame that will hold up to 7 modules or a standalone enclosure.

►Features & Benefits

- Passes 40MHz-2200MHz frequency range RF signals (400MHz-2200MHz with -LNB option)
- Functions as a splitter or combiner
- 7700 series modular form factor for neat/clean system integration
- Completely passive design for high reliability
- Fully hot-swappable from front of frame
- -LNB option passes DC power to LNB
