

**DreamCatcher™**  
**DC-LIVE-EDIT**  
Integrated Non-Linear Editor

The **DreamCatcher™ LIVE EDIT** software includes the most utilized features on any non-linear editor from an intuitive interface that is integrated directly into the **DreamCatcher™** live production environment.

The **DC-LIVE-EDIT** software provides instant editing capabilities without the need to transfer content to an edit station. The integrated live editor eliminates render times by accessing live content directly using the **RENDER-FREE** engine. Familiar keyboard shortcuts provide a tool that any craft editor can master quickly.

By utilizing the **DreamCatcher™** cluster and integrated transcoding engine, **DC-LIVE-EDIT** will provide immediate access to any content live or archived. In addition, the integrated live environment is **ANGLE-AWARE** for simple post-edit angle swaps.

**DC-LIVE-EDIT** provides editors with a platform that will showcase their talents and distribute their stories without delay. No other system combines the best attributes of a traditional non-linear editor with the immediacy of the live production environment!

## FEATURES & BENEFITS
