

Attention Business/Financial Editors:

Evertz Technologies Limited Announces TSX Approval of Normal Course Issuer Bid

TORONTO, June 27, 2011 - Evertz Technologies Limited (“Evertz”) announces that it has received acceptance from the Toronto Stock Exchange (“TSX”) of its Notice of Intention to purchase up to 3,751,717 of its outstanding common shares from time to time in accordance with the normal course issuer bid procedures of the TSX and applicable Canadian securities laws.

Pursuant to the issuer bid, Evertz may purchase for cancellation up to 3,751,717 of its outstanding common shares during the 12-month period commencing June 29, 2011 and ending June 28, 2012. The total aggregate number of common shares which Evertz may purchase pursuant to the issuer bid represents approximately 5% of the 75,034,356 issued and outstanding common shares of Evertz as at June 22, 2011.

The price which Evertz will pay for any common shares purchased under the normal course issuer bid will be the market price at the time of such purchase. All purchases of common shares by Evertz will be made through the facilities of TSX.

Other than as otherwise permitted pursuant to once-a-week block purchases in accordance with TSX rules, Evertz may purchase up to 3,835 common shares per day, which represents approximately 25% of the Evertz’s average daily trading volume for the six calendar months prior to June 2011 (being 15,342 common shares) .

Evertz believes that its common shares currently trade in a price range that does not adequately reflect their underlying value based on Evertz’s business and strong financial position. As a result, depending upon future price movements and other factors, Evertz believes that its outstanding common shares represent an attractive investment and a desirable use of a portion of its corporate funds.

Forward-Looking Information:

This press release contains certain “forward-looking information”. All statements, other than statements of historical fact, that address activities, events or developments that Evertz believes, expects or anticipates will or may occur in the future (including, without limitation, statements relating to Evertz purchasing its common shares under the normal course issuer bid) constitute forward-looking information. This forward-looking information reflects the current expectations or beliefs of Evertz based on information currently available to Evertz as well as certain assumptions including, without limitation, assumptions as to the price of Evertz’s common shares. Forward-looking information is subject to a number of significant risks and uncertainties and other factors that may cause the actual results of Evertz to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on Evertz. Factors that could cause actual results or events to differ materially from current expectations include, but are not limited to, a significant appreciation in the price of Evertz’s common shares.

Any forward-looking information speaks only as of the date on which it is made and, except as may be required by applicable securities laws, Evertz disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise. Although Evertz believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein.

About Evertz

Evertz Technologies Limited (TSX: ET) designs, manufactures and markets video and audio infrastructure equipment for the production, post production, broadcast and internet protocol television (“IPTV”) industry. Evertz’s solutions are purchased by content creators, broadcasters, specialty channels and television service providers to support their increasingly complex multi-channel digital and high definition television (HDTV) broadcast environments and by telecommunications companies to roll-out IPTV. Evertz’s products allow its customers to generate additional revenue while reducing costs through the more efficient signal routing, distribution, monitoring and management of content as well as the automation of previously manual processes.
