

Evertz Serves Up Encoders/Decoders for Live Events

At the 2013 Wimbledon Championships BBC Sports and News utilized Evertz 7881DEC-H264HD and 7881ENC-H264HD products as part of their contribution solutions to bring coverage back to main sites for onward transmission. The Evertz 7881DEC-H264HD was used to decode 3D contribution streams coming from Wimbledon to MediaCityUK in Salford and the 7881ENC-H264HD was used as a main contribution circuit back to Broadcasting House.

Gal Garniek, Evertz VP of Distribution & Compression Systems, says, "Evertz is excited to deliver a solution that can help capture major events such as the Wimbledon Championships. The 7881 Series is part of our compression portfolio which includes network management and monitoring in addition to high quality encoders and decoders."

About Evertz

Evertz Technologies Limited (TSX: ET) designs, manufactures and markets video and audio infrastructure solutions for the television, telecommunications and new-media industries. The Company's solutions are purchased by content creators, broadcasters, specialty channels and television service providers to support their increasingly complex multi-channel digital and high definition television ("HDTV") broadcast environments and by telecommunications and new-media companies. The Company's products allow its customers to generate additional revenue while reducing costs through the more efficient signal routing, distribution, monitoring and management of content as well as the automation of previously manual processes.
