Evertz to deploy IRD Media Gateways

Burlington, Ontario - November 10, 2014 - Evertz Technologies Limited (TSX: ET), a global leader in video network innovation, announces that a leading U.S. National Broadcast Network has selected Evertz' new IRD media gateway solutions for their nationwide affiliate distribution network. The 7881IRD media gateway receives encrypted content over a satellite and/or IP networks. In addition to the flexible interfacing (RF, ASI or IP), the 7881IRD provides full in-band remote monitoring and management. The project also includes the Evertz compression, infrastructure, VistaLINK monitoring, and MAGNUM control solutions in a satellite head-end.

For more information on the 7881IRD go to: <http://www.evertz.com/products/7881IRD-H264HD-LB4>

About Evertz

Evertz Technologies Limited (TSX: ET) designs, manufactures and markets video and audio infrastructure solutions for the television, telecommunications and new-media industries. Evertz provides complete end-to-end solutions to content creators, broadcasters, specialty channels and television service providers to support their increasingly complex multi-channel digital and high definition television ("HDTV") broadcast environments and by telecommunications and new-media companies. Evertz' products allow its customers to generate additional revenue while reducing costs through the more efficient signal routing, distribution, monitoring and management of content as well as the automation of previously manual processes.
